

Q.20) Program to read list of names and sort the list in alphabetical order.

```
def Names_sorting():
```

```
Names = input("Enter a list of names separated by commas: ").split(',')
```

```
Names = [name.strip() for name in names]
```

```
Names.sort()
```

```
print("The names in alphabetical order are:")
```

```
for name in names:
```

```
print(name)
```

```
Names_sorting()
```
