Q.12) Write Python script for converting decimal number into Binary number.

```python
def Decimal_into_Binary(Decimal_num):

    Binary_num = bin(Decimal_num)[2:]
    return Binary_num

user_decimal = int(input("Enter a decimal number: "))

Binary_result = Decimal_into_Binary(User_decimal)

print(f"The binary representation of {User_decimal} is: {Binary_result}")
```
